

UM80WF

WALL MOUNT SPRAY GUN CLEANER WITH WASTE WATER TREATMENT BY FLOCCULATION

CLEANING BECOMES FAST AND EASY

- Water under high pressure flows, at the press of a button, to thoroughly clean the paint passage in less than 30 seconds.
- The outside of the gun is cleaned with the Flow-through Brush and dried with the included Blow Gun.
- Locating the compact UM80WF inside the spray booth saves time because the gun can remain connected to the air line and the painter can remain in the booth; the paint channel is flushed while the paint is still "wet".
- After cleaning, treat dirty water by Flocculation and Filtering to recover clean water for reuse.
- For use with waterborne paints only.
- For use in the spray booth or in the general shop area.
- For use with water only or with Uni-ram's effective cleaner, AQUA-KLEEN PGC, Part No. 102-8200, (1L concentrate)
- Use Uni-ram's COAG-KLEEN, Part No. 102-8300, coarse-grain flocculant granules for efficient flocculation without messy airborne contamination
- Ideal for cleaning PPS and other disposable cup adapters.

FEATURES

- Waste water treatment system built in.
- Cleaning tools - nozzle for cleaning paint passage, pad to clean cap, flow-through brush to clean exterior of gun and blow gun to dry paint passage and exterior.
- Air supply whip line included.
- Non-corrosive stainless steel cleaning tank.
- Powered by Uni-ram's dual diaphragm pump.
